

The Home page design description. The home page is designed to fit the layout of the old sites. The design is changed to make use of the tie-dye designs.

The order form page design description.

This design uses a t-shirt design for the background. It also makes use of a custom order form for customers to order products

with. The form shows the customers the different patterns they can choose from

FOLLOW US

The product pages are designed so a customer can pick a premade product and submit a form telling the client the custom changes they want made to the products.

The product page design description.

The products page is a list of the products the client has on the current site this page is not done design-wise only function-wise. The design will be like the order form page.

Other pages

Some pages are not made yet, but the design of those pages is decided. The pages that still need to be made are the About Us and the Contact Us page. Those pages will design will be a mix of the current site and the order page design.
